

## Recommendation Letter

I have known Gonalo Pestana last semester when I was teaching an Electronic Course in Communications Network Engineering at Instituto Superior Tcnico of Lisbon.

As a student, Gonalo Pestana has been an active and dedicated participant in the classes in both, experimental and theoretical scholar activities. Furthermore, Gonalo's excellent academic performance in my discipline also shows his exceptional learning skills and work capabilities.

In my teaching activity I had also the opportunity to know Gonalo Pestana as the class delegate. In these contacts I could perceive another important dimension of Gonalo Pestana personality: his social and organizational skills, strong leadership abilities that his classmates both admired and respected.
